

Model 610 or 612

This three sided, oak, credenza-style speaker cabinet contains two channels for any manual Division of the organ. This configuration is ideal for situations where there are no pipe or speaker chambers and the speakers have to be exposed. For example, in the case above, the cabinet was the two channels of Choir Division.

Excellent dispersion is created by the sound emitting from three planes. Two low frequency drivers are placed in a divided centre section at the front of the cabinet, with a mid-range and tweeter in each side section.

Model 610

Consisting of:

6 Drivers—two 10"woofers, two 6" mid-range, and two titanium dome tweeters

Frequency Response: 30Hz to 18Khz

Power Handling: 200 Watts
